Dear colleagues!

It is our pleasure to announce that the mini-conference dedicated to 95-th birthday of Anatolii V. Skorokhod will be held online on **9-10th** of September

The main subjects of the conference are:

- stochastic flows
- non-classical diffusions
- large systems of interacting particles

It is supposed that there will be two days of the zoom meetings where participants will present the 30-min talks.

Abstracts of the conference will be published online.

Deadline for registration and submission of your abstracts is August 25.

In order to present a talk please fill in the following registration form:

<https://forms.gle/Tzi9rSrL6eqyhqUJ7>

Recommendations for authors

The abstract should be prepared in LaTeX (as a LaTeX-file).

Title of your talk

N. I. Author,¹ A. B. Coauthor.²

Some other subtitle, e.g. Problem setting, Main result, Discussion etc.

Let us consider...

Theorem 1. If ... then ... for all $x \in \mathbb{R}$.

Please do not use your own shortcuts for standard constructions, e.g. please use full `mathbb{C}` command to obtain \mathbb{C} symbol. This will guarantee that all the symbols will appear as they should be.

Remark 1. Consider the formula

$$R(t) = e^{i(S(t)-I)}. \quad (1)$$

Please do not use automatic \TeX numeration and do not introduce labels and references via those labels. Please use explicit numeration of formulas using `eqno` command instead, as it is shown in (1). This will make each text self-contained.

Acknowledgments. Authors are thankful to ...

Please do not use automatic \TeX bibliography via bibitem labels. Please use numeration in square brackets instead, e.g. [6]. This will make each text self-contained.

The recommended length of the text is 1-2 pages, from the title of the talk to the last reference. E.g. this sample text has the length equal to one page.

Hope you will enjoy the Conference :)
