This is an example of a manuscript for the proceedings of ECIT '08

Harald Fripertinger,* Detlef Gronau
and Iryna Sushko

Abstract

This is where the abstract should be placed. It should give a concise summary of the material in the article below. Replace the title, authors, and addresses above with your own title, authors, and addresses. You may have as many authors and addresses as you wish. Do not use footnotes in the abstract or the title.

Here you may begin with your own contribution. The way how to produce title, author name(s) and address(es), running heads, bibliography etc you can see in the TEX source file of this document.

The hard copy should be produced by using LaTeX2e together with the enclosed style file.

Please, read the following instructions carefully, since it contains important information about preparing your file.

You should have three files in your working directory:

"`readme.1st`" – a preliminary guide.

"`ecit08.sty`" – the style file that provides the higher level LATEX commands for the proceedings. Don't change these parameters.

"`Sample_file.tex`" – the file for your main text with instructions.

Change it at appropriate places and, eventually, rename the file. Please do not change the first two lines:

```
\documentclass[12pt,twoside]{article}
\usepackage{ecit08}}
```
However we recommend keeping one initial version of the file for reference before deleting the main parts of the text.

The whole manuscript should be written in proper English. When you supply a hard copy, it should be printed single-sided.

Graphics should be included in EPS - format, e.g. with the command
```
\includegraphics*[width=12cm]{file.eps}
```

References and citations. Please make the references according to the following examples. *Do not forget to quote also the editor(s) in the reference of a paper contained in a cumulative work (proceedings etc.). Please use the abbreviations of serials according to the standard of Math. Reviews.*

Please use the citation feature of LATEX which automatically enumerates your bibliography items: To get the citation "Hmissi [4]" in your manuscript you have to type in your TEX file `Hmissi \cite{Hm93}` while the corresponding bibliography item is of the form

```
\bibitem{Hm93} Hmissi, M., {\em Sur les solutions globales de
l'\'equation des cocycles}, Aequationes Math.~{\it 45} (1993), 195--206.
```

Please do not type it in the form: `Hmissi [4]`.
